# RICE *Fuller* & MILLER

(KANRYU VSRH1562E, One Pass)

- **Efficiency** : 150kg/hour
- This high-performance **hulling-fan method** can achieve hulling efficiencies of 90%.
- It **automatically** sorts hulled rice from rice husks, then separates rice husks and rice bran.
- The husked brown rice is taken out from behind the sorting room and can be poured directly into bags.
- The **improved milling roll** makes long rice produced with minimum breakage.
- It features **low-temperature milling** with a hollow pipe and a vacuum.
- To change the whiteness dial and the net without using any tools.
- **Single phase 220V/1.5kW**
